TIDES IN THE EARTH.

The Moon Pulls Our Solid Globe Out of Shape Twice a Day.

EDISON

CEMENT

COMPANY

EDISON

That the attraction of the sun and moon not only esuses tides in the ocean, but has a corresponding influence on the solid earth itself, has now been definitely proved by Dr. O. upper, the Rev. F. B. Kellogg, Water- ter of a century ago Professor G. H. tides in the solid earth as well as in the fluid seas, but he was unable to detect them, and his only conclusion was that the earth's mass was very rigid-at least as rigid as steel. Dr. Hecker now confirms this conclusion, but with his improved instruments and methods he has been able to detect and measure the amount by which the moon pulls the solid earth out of shape twice a day. Dr. Hecker's measurements, which lasted continuously more than two years, were to ascertain the lunar influence on the earth's gravity by observing the oscillations

of a delicate pendulum. It was by comparing his results with the figures as calculated for a rigid earth that he was able to detect the tidal deformation caused by the pull of both moon and sun. Dr. Hecker's pendulums were a complicated series of People, the Rev. Donald Fraser bars joined together, and they were installed in a specially designed brick 3:05. Why the Ministry Is Failing to Attract Men of Force" the surface of the ground, where the tenning Rev. S. F. Blomfield of Montperature remained practically constant the climate is one of the finest in the linth, one mile from the village. 40 acros perature remained practically constant the climate is one of the finest in the init, one mile from the vinage. To ment—up to date tenement of five rooms at about 12 degrees centigrade, or 54 world. Nine months in the year the tillage. Good buildings and well watered on B street, flachelder's meadow. Apply to degrees F. A continuous record of skies are bright, and the winter is at 1 their position was kept by means of from December, 1902, to May, 1905, Hecker carried on the laborious series of observations that have now established the existence of lunar and solar tidal waves in the solid but flexible

mass of the globe.-New York Her-

Lost-A French Colony. The government of France has mislaid a colony, and the government of Mexico has found it. It is Clipperton island, a little isle in the Pacific ocean, 10 degrees north and 100 degrees longitude west. It is one of a large group of lalands which are visited periodically by a French warship. Some time ago, when the warship visited the island, the French sailors found soldiers there in Mexican uniform and the Mexican fing floating serenely over the island. The island is directly east of the mouth of the Panama canal, which gives it a certain amount of importance. The matter has been placed in the hands of the French foreign office, and "communications are pending." The warship discovered that the French government had mislaid the island two years ago.—Harper's.

What Becomes of the Corn. People often wonder, particularly those who have traveled for hundreds of miles through the corn belt, what becomes of the corn which is grown every year. In the year 1908, when the total crop was 2,666,000,000 bushels, 241,000,000 bushels were consumed in flour and grist mill products, 3,000,000 bushels in the manufacture of starch, 9,000,000 for malt liquors, 17,000,000 in the production of distilled liquors, 40,000,000 for glucose, 190,000,000 for export and 18,000,000 for seed, making a total of 518,000,-000 hushels, or 19.3 per cent of the entire crop. The remaining 80.7 per cent, or 2,148,000,000 bushels, seems to have been used almost entirely for feeding purposes.-Corn Reporter.

Humorous Footpad. Circaestan Girl-So you were held up, ch? Why didn't you ask the high-

wayman to spare you? Living Skeleton-I did, and he said, "You are spare enough." - Chicago

"What's the matter? Has your husand ceased to love you?" "N-no, but he's ceased to be scared when I have hysterics." - Cleveland Farms Listed for the Spring Trade in
